

We now have Zero EV chargers onsite for public use.

Zero is Meridian's EV charging network

At Meridian, we're committed to doing good things with our energy to help New Zealand decarbonise. Once completed, the Zero charging network will have over 500 charge points nationwide.

Get charging in four easy steps

- 1 **Download the Zero app** 

Create an account and set up your payment card. Getting this sorted means you'll be all ready to charge when you arrive.

- 2 **Plug in using your own AC charging cable** 

To use AC chargers, you'll need to have your own AC charging cable that is compatible with your vehicle. Three pin plugs are not compatible with AC chargers.

- 3 **Scan to start charging** 

Scan the QR code on the charger using the Zero app to start charging. Through the app you can monitor your charging progress.

- 4 **Stop charging and unplug** 

When you're done, press the stop button in the Zero app before unplugging your vehicle. Don't forget to take your cable with you.

If you get stuck, step-by-step instructions are provided in the Zero app and on the side of all Zero chargers. Zero's terms of use apply.
